

Change Log 5/4/2020

5.28.0.3

New Features

- The Pending Documents window will no longer check for obsolete notices automatically. This feature has been linked to a new button placed in the window

5.28.0.1

New Features

- Added more comments so that whenever an autopay is modified/added for a customer a comment will be generated
- When dual processing with Bambora for ACH, the check screen will automatically select the appropriate processor

Bug Fixes

- Fixed an issue where showing the last 30 days in the Pending Documents window would cause the window to close

New Features

- Added the ability to show gate hours and facility hours through document merge fields
- Added a Reservation Confirmation document to be generated in addition to a payment receipt (if applicable). Also works with third party integrations
- Added the ability for Canadian customers to process ACH/EFT payments through Bambora
