

## Storage Commander Version 5.18.0.0

### Change Log New Features

- Expanded our available API features to support the onboarding of additional partners including Storelocal, OpenTech and Automatit. Additional partners will be announced within the next couple months.
- Added additional integration support for OpenTech kiosk hardware. We will be fully integrated into their other products including their INSOMNIAC Live! Call Center, INSOMNIAC CIA Access Control, XpressCollect Automated Collections and StorageTreasures Online Storage Auctions by April.
- Added the ability to save comments to all units for customers with multiple units.

### Corrections

- Financial library updates to improve credit card integraton support with our credit card partners. Additional changes implemented to support better communication with the credit card terminal.
